Primary mechanism: resource band vs fate
Spearman = -0.310 [-0.398, -0.224]
Transient channel: drift vs fate
Spearman = 0.286 [0.190, 0.385]
|d|=2.24
|d|=17.72
|d|=23.77
binned mean (mother bootstrap 95%)
small-$|d|$ pairs sit at $B(d) - B(0) \approx 0$
paired Δq_B
interface-resource change $B(d) - B(0)$
measured first-sweep drift a_1
