Exploratory follow-up: survivor composition can change with time
N01: median / IQR; labels = at-risk n
Cooperation among survivors
Sweep
b=1.1
b=1.11
b=1.12
N01: unconditional Kaplan–Meier
Survival probability
Confirmation time (sweeps)
N02: b=1.16, diffusion=0.35; Wilson 95%
Confirmed depletion fraction
Damaged nodes m (small display offsets)
compact
stripe
four patches
random
N02: b=1.16, diffusion=0.4; Wilson 95%
